Almaty Central Stadium, Almaty, Kazakhstan

Almaty Central Stadium, completed in 2010, is an open air, multi purpose sports stadium with a seating capacity of 26,250. Its distinctive alternating yellow and green section colors are enhanced by the Max Grip coating.

Central Stadium is exposed to ambient temperatures ranging from -10°C in winter to over 40°C in the summer months as well as hundreds of thousands of foot traffics each year.

Safe stepping on the walkways is assured

by the Clear Coat Anti Slip that features a gritty surface texture.

Home to the national football team, Almaty Central Stadium will retain its outstanding appearance for years to come.
