

Polyflex PW **Changi Wastewater Facility, Singapore**

Polyflex PW is a NSF listed high performance polyurea coating/lining for both steel and concrete substrates.

Polyflex PW offers superior service life in a

variety of climatic conditions for potable water or chemical resistance service.

Tests conducted at independent laboratories have shown that Polyflex PW continues to perform

well even when exposed to sulphuric acid solutions of 20% concentration. Polyflex PW seamless membrane provides outstanding protection where chemical resistance is required.
