

Polyflex**Shubinsky Hydroelectric Power Station, Ridder, Kasakhstan**

The Shubinsky hydroelectric station is part of the oldest hydroelectric power generating complex in Kazakhstan having been founded in 1935.

The specific needs of this facility called for a waterproof coating that would be long lasting and hard wearing.

Conditions in the facility included occasional flooding, heavy rolling equipment, temperature variations and other challenging conditions.

Type of facility	Hydroelectric power generating complex
Contractors / Applicators	Antares
Date of project	2011
Substrate	Concrete
Surface prep	Mortar epoxy
System:	
Primer	Mono Ferro Pur
Topcoat	Polyflex 304
